Hammonds enhances green credentials in 2010 with t-mac Technologies

Last year Hammonds entered a competition in Water, Energy and Environment magazine to win a t-mac energy monitoring and control system with the aim of reducing their average annual utility spend by an estimated 10 – 20 per cent.

Many organisations from across the UK and Ireland entered hoping to win the prize which is worth up to £10,000. After the judges' deliberations, Hammonds, the fitted furniture specialists were chosen as the overall winner.

With 84 stores nationwide Hammonds is committed to improving the standard of their energy management in 2010, to keep in line with the quality of furniture they produce.

Claire Parker, marketing director at Hammonds Furniture Ltd said: "Reducing our impact on the environment is always at the forefront of our minds as a business. For example, we've been working with the Woodland Trust for many years and to date have planted over 25,000 trees. We are delighted to have won such a prize and look forward to working with the team at t-mac Technologies."

Lisa Wilkinson, director of t-mac Technologies said: "With the Carbon Reduction Commitment coming into force, all businesses will have to look hard at their green credentials. We wanted to give one business the chance to win a t-mac system to help them on their way. This valuable prize is an opportunity for Hammonds to show their clients, staff and other businesses how easy it could be to become a greener business.

"Many congratulations to Hammonds Furniture Ltd, we are really looking forward to working with them and can't wait to see how much they save and how t-mac benefits their business". Water, Energy and Environment magazine will be following the progress of Hammonds Furniture Ltd as they have their t-mac installed over the next year.
