

Being green is plain sailing

t-mac Technologies Limited is not only helping businesses save energy and money with its remote energy management system but it is also helping to encourage greener lifestyles with the sponsorship of eco-friendly wind-powered travel.

The t-mac branding now adorns the sail of a Hobie 21 Sport Cruiser sail boat, which is operated as both a tour and taxi service in the St James area of Barbados in the West Indies.

Lisa Wilkinson t-mac director said: "Given the environmental benefits of wind powered travel and our commitment to helping businesses improve their green credentials we thought that sponsorship of the boat was the perfect opportunity for us to not only support a carbon neutral travel method but also to boost the local community in an area we enjoy."
